Astek brings together its expertise in new offices in Lyon and accelerates its innovation momentum around high-value-added projects

Astek today inaugurates its second-largest site in France, located in Lyon at 2 impasse Pierre Baizet (9th arrondissement). With over 2,000 m² of modern and functional space, this site serves as a true collaborative hub where technical expertise meets globally scaled projects.

A new boost for innovation and large-scale projects

This new space reflects Astek's strategy to strengthen its local presence by bringing together all strategic competencies in one location to foster collaboration and support the development of major projects. The goal is to offer clients enhanced support by gathering the essential talents needed to tackle today's and tomorrow's industrial and technological challenges.

An integrated and strengthened team in Lyon and the Auvergne-Rhône-Alpes region

The site hosts nearly 100 employees, resulting from the merger of teams from Astek (Lyon Part-Dieu), Emisys (Villeurbanne), and Riversen (already based on-site).

In total, 600 experts across the Auvergne-Rhône-Alpes region—spread between Lyon, Grenoble, and Clermont-Ferrand—are driving the Group's growth momentum.

A sustainable space designed for teams

Designed to combine performance and responsibility, the Lyon site features a 400 m² terrace, spacious collaboration areas, and bright workstations. The premises meet Astek's high standards: BREEAM Very Good certification, 100% renewable electricity, and an environment that promotes employee well-being. A concrete demonstration that growth can go hand-in-hand with environmental commitment and quality of work life.

With this new location, Astek reaffirms its role as a key partner for industrial and technological companies, while asserting a strong belief: sustainable performance stems from innovation, teamwork, and a high-quality work environment.

"Teams are excited about this new space that allows them to work together under optimal conditions, in the heart of a particularly dynamic region. For the Group, these new offices are an opportunity to unite and attract talent, develop high-value-added projects for our clients, and confirm our commitment in terms of responsibility." — **Julien Gavaldon, Chairman of the Management Board of Astek Group.**

About Astek

Founded in France in 1988, Astek is a global player in engineering and technology consulting, with a presence on every continent. With expertise in a wide range of industrial and service sectors, Astek supports its international customers in the intelligent deployment of their products and services, and in the implementation of their digital transformation.

Since its creation, the Group has based its development on a strong culture of entrepreneurship and innovation, and on the support and skills development of its 10,000 employees, who are committed every day to promoting the convergence between digital technologies and complex systems engineering. Astek expects to achieve consolidated sales of €730m by 2025. https://astek.net/
